

PROFESSIONAL MAINTENANCE

for your INDEX and TRAUB machines

Ensure a high level of technical availability – with the INDEX Machine check

Predictive maintenance begins with regular checks of your machines. For an attractive fixed price, we inspect your INDEX or TRAUB machines to enable targeted maintenance, overhaul and repairs. This gives you the peace of mind to plan your production with confidence, now and in the future.

CONDITION ANALYSIS

We prepare a detailed condition analysis of your machine under production conditions.

OBJECTIVES

Our comprehensive inspection helps to ensure the reliability of your processes and the technical availability of your machines.

MEASURES

Necessary follow-up measures, costs, and schedules can be planned and offered in good time.

INDEX Machine check – your benefits

- ▶ Available for all machines – individually or with personalized framework agreements
- ▶ Expertise and competence directly from the manufacturer
- ▶ Attractive fixed prices with full cost control

Proactively prevent damage – with INDEX Maintenance

Ultimately, it is the efficiency of your production that counts. With agreements tailored to your needs and custom intervals, our maintenance program gives you the peace of mind to plan your production with confidence.

Benefit from our qualified and experienced service engineers, who are experts in inspecting and maintaining machinery. The maintenance results will be provided in a detailed inspection report. You will also be given recommendations for further machine optimization.

SERVICES

- ✓ Inspection of machine condition according to checklist
- ✓ Required adjustments carried out
- ✓ Leak tests (hydraulics, coolant, air, lubrication)
- ✓ Filter replacement (control cabinet, spindle, hydraulics, pneumatics)
